

POHL

POHL ECOPANEL[®] SYSTEM

RAINSCREEN METAL FACADE

POHL FACADE SYSTEMS

All POHL systems are back ventilated rainscreen facades. For good reason: ventilated curtain walls easily meet all the complex requirements of modern building projects.

Metals such as aluminum, stainless steel and brass provide the cladding material for all our systems, giving you a rainscreen system with maximum energy efficiency, great freedom of design and a long service life.

MAXIMUM PROTECTION FROM ENVIRONMENTAL INFLUENCES

POHL rainscreen systems are always built with the following components: support frame, substructure, insulation, back ventilation and cladding. A well-thought-out concept with many constructive advantages:

Property: Grafenberger Höfe, Düsseldorf, Germany

Architect: Alf Prasch & Architekten

Facade system: POHL Ecopanel

Material: Aluminum

Effective protection of the underlying components from environmental influences

High resistance to mechanical stress and vandalism

Two-stage protection against heavy and driving rain

Simple replacement of damaged elements

Dry insulation layer and variable insulation thickness

Convenient assembly and tolerance compensation

Highest fire protection standard (EN 13501-1)

Optimal sound insulation (up to 14 dB higher sound reduction index)

Protection from overheating in summer and flexible shadowing options

Healthy interior climate

POHL ECOPANEL AT A GLANCE

POHL ECOPANEL is the right choice for architectural ideas with a slim, horizontal emphasis. The system can be easily installed and impresses with its high-quality optics. Metals such as aluminum, stainless steel and brass provide the cladding material for all our systems.

Together with our broad surface portfolio we offer you maximum design possibilities with a cost-efficient facade system.

Property: Yachtclub Kiel, Germany

Architect: Nagel Architekten

Facade system: POHL Ecopanel

Material: Steel

SAVE TIME AND COSTS IN ENGINEERING

Every architectural design is unique. Nonetheless planning time and costs can be significantly reduced through the professional development of lead details.

**UP TO
30%
TIME SAVED IN
PLANNING**

We provide you with all the details of the POHL rainscreen facade system in 2D and 3D and our technical planning department will support you in the detailed engineering of your specific project.

BIM READY

Your project is BIM-based?
We have the appropriate data available.

**EXTREMELY
LOW ERROR
RATE**

The high degree of detail in our technical drawings guarantees a smooth implementation for the entire project implementation.

Property: Kaicenter, Düsseldorf, Germany
Architect: Döring & Partner
Facade system: POHL Ecopanel
Material: Aluminum

EASY INSTALLATION

POHL Ecopanel follows the modular principle. The suspension pins and the support rails are already prefabricated to size and facilitate installation. The degree of prefabrication is adjusted individually depending on the situation on site.

INSTALLATION OF THE WALLBRACKET

The multiple pre-punched wall brackets allow compensation for carcass tolerances of ± 25 mm. By using stainless steel wall brackets ensures the highest energy requirements are fulfilled.

FASTENING THE INSULATION LAYER

The insulation material is cut at the points of the spacers and guided over them to the outer wall. In the next step, the mounting rails are fixed to the brackets.

FIT PANELS AND FASTEN WITH SCREWS

By using the POHL Clip the panels are sequentially inserted and screwed tight.

RESULT

POHL Ecopanel is successfully installed and protects the building effectively and sustainably.

POHL ECOPANEL

Based on the standard details, POHL Ecopanel can be used for the building envelope as well as interior cladding.

POHL 360° SERVICE FOR YOUR PROJECT SUCCESS

Architecture, facade construction and sustainability – a complex building project must coherent from all perspectives. We offer you the technical expertise right from the start to bring all sides together. POHL's interdisciplinary team of sales, project management, technology and production is at your disposal.

Are you working towards a LEED or Bream certification?
We will support you: certification@pohl.net

Property: Forschungszentrum Caesar, Bonn, Germany

Architect: BMBW Architekten, BDA & Partner

Facade system: POHL Ecopanel

Material: Stainless Steel

100 PERCENT ENVIRONMENTAL RESPONSIBILITY

Responsible use of resources is one of our core corporate values. Through an optimized supply chain, we are able to reduce the CO² footprint of our products to a minimum. Starting with the purchase of emission-free base material, through resource-saving production to well thought-out packaging concepts and a 100% recycling rate.
